ABOUT US

Gdansk College of Health is a school with over 20 years of experience, which educates specialists in the fields of dietetics, cosmetology and physiotherapy, at the level of bachelor's, master's and one-cycle five-year master's degree. Innovative activities, constant development, as well as regular pursuit of adjusting our offer to the expectations of the labour market distinguish us. The high quality of education remains unchanged. The College has been identified as a training centre for well-qualified health professionals. Practice - a key aspect in program implementation is under particular attention, as it represents a very important element in the future work of a dietician, cosmetologist and physiotherapist. Thus, we are sure that our graduates will continue their professional career with dignity and full professionalism.

OUR ADVANTAGES

- high quality of education
- great experience
- academic staff consists of an outstanding team of doctors, specialists, experts and consultants in the fields of medical sciences
- well-equipped laboratories make the Gdansk College of Health very important training centre for physiotherapists, dieticians and cosmetologists
- we are focused on providing well-organized educational proces – our students have an access to the best source of practical knowledge. They have to attend clinical classes in hospitals as well.
- by implementing the project „Practically for Health” – development of professional competences within integrated educational programmes – we established the Academic Health Centre, where our students of cosmetology use the acquired knowledle in a practical way through additional training, workshops and projects
- we support professional internships in reputable medical centres and prestigious diet, cosmetology and physiotherapy offices. Modern and rich facilities for the practical learning and a wide base of facilities, not only throughout the country but also abroad, make possible to implement the program at the highest level.
- research conducted by the College shows that our graduates are valued specialists on the market.

EDUCATIONAL OFFER

BACHELOR STUDIES IN ENGLISH

- ❖ Dietetics
- ❖ Cosmetology

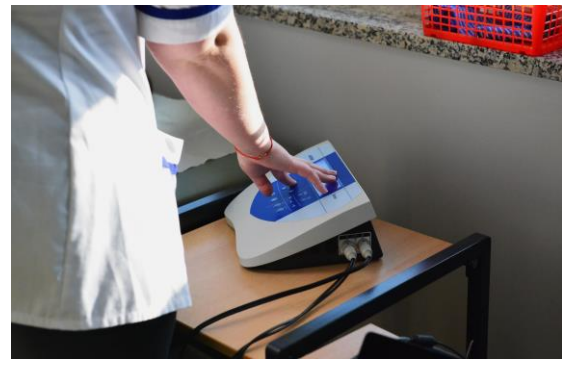

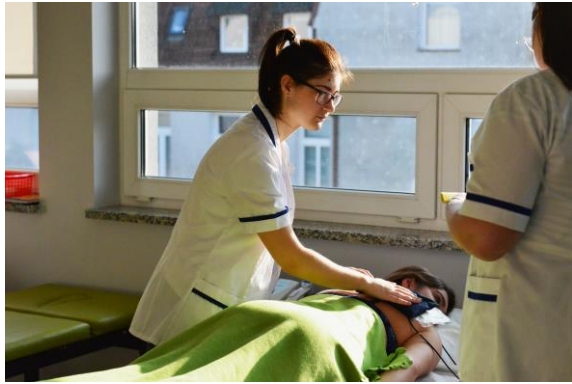

ONE-CYCLE FIVE-YEAR MASTER'S STUDIES IN ENGLISH

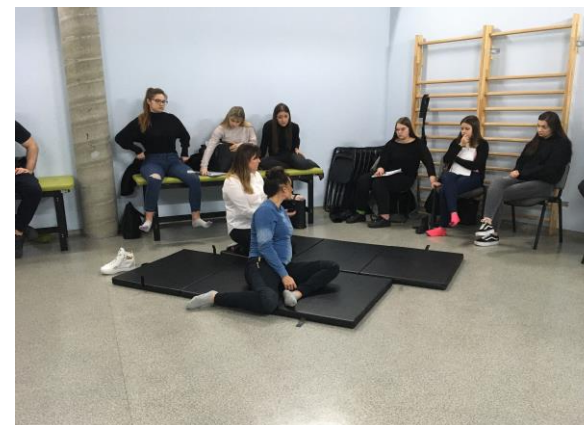

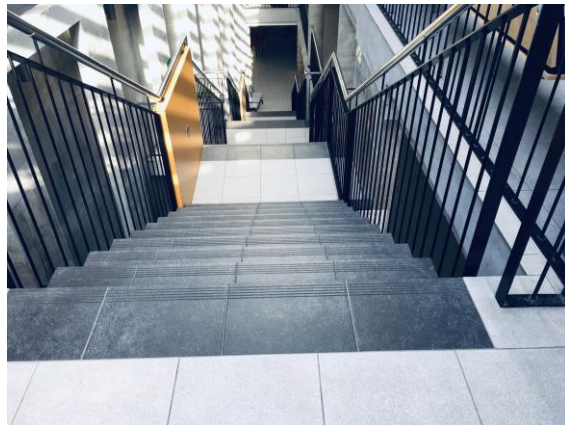

- ❖ Physiotherapy

All courses are held either **FULL-TIME** or **PART-TIME**.

DIETETICS

In the course of three years of study you will acquire many new skills - among others, you will learn how to conduct a nutritional interview, give individual and group advice, operate and use special devices designed to identify selected food ingredients and prepare food. You will be able to plan and implement appropriate dietary management in order to prevent and treat diet-related diseases. You will also learn the principles of interaction between medications and food.

Duration of bachelor's degree studies: 3 years

PHYSIOTHERAPY

Along with lots of practical skills, we will teach you how to perform physical therapy, kinesitherapy, massage and manual therapy as well as other physiotherapeutic methods. You will learn how to control the effects of physiotherapeutic procedures and how to select medical devices for specific dysfunctions and patient's needs. We will teach you how to take care of your own health, physical culture and education, and how to motivate others to do so.

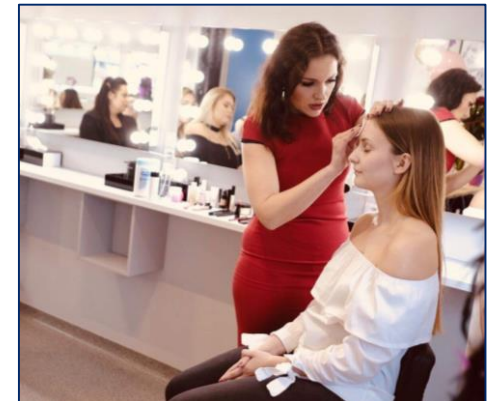

Duration of master's degree studies: 5 years

COSMETOLOGY

You will learn how to operate specialized equipment used in cosmetology: when to use it and how to use it. You will learn how to perform podology treatments and how to deal with various podological diseases problems. You will learn how to make your own cosmetics based on a formula and an appropriate chemical calculations. You will also find out how to determine the influence of the ingredients of a given cosmetic product on biochemical processes in the skin. You will learn the principles of analysing the influence of various stimuli on the human body, including aromatherapy. You will gain knowledge to diagnose medical conditions and cooperate with specialists in this field.

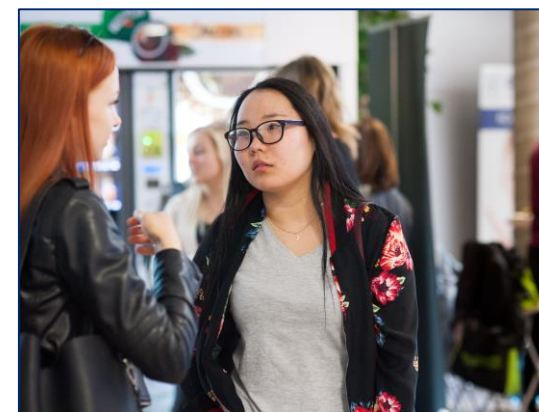

Duration of bachelor's degree studies: 3 years

Studies in English

The Gdansk College of Health, as a first school in Pomerania offers courses in English for foreigners and Polish candidates in dietetics, cosmetology and physiotherapy.

Thanks to the studies, you will absorb specialistic terminology. Our students learn how to cooperate in an international environment and have daily interaction with students from various countries. Diploma in English language increases chances of finding prestigious job in Poland and throughout the world.

LABORATORIES

High quality equipment as well as constant upgrade of our labs according to the modern trends represent one of the advantages of the Gdansk College of Health. Our students can be trained using professional equipment.

ERASMUS+ PROGRAM

Thanks to the international program Erasmus +, our students can go abroad in the scope of an international exchange program to carry out practical works in other countries.

Our valued partners, not only in Poland, but throughout the world, support our students to acquire programs at the highest level.

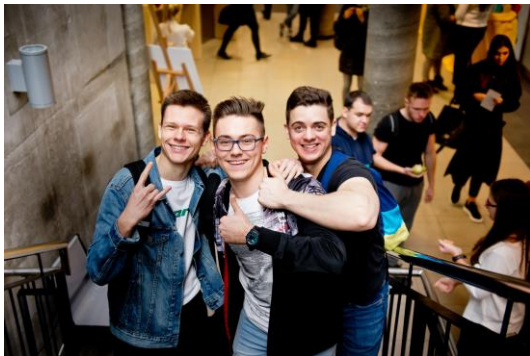

EVENTS

We organize events and workshops regularly which give participants unique chance to attend exceptional lectures, participate in seminars and explore products and services of invited stakeholders. The biggest event we organize is the Health Day celebration.
